

## BA Risk Assessment Form: Biological Agents and Materials

A BA risk assessment is required for any work involving the possession, use or exposure to biological agents and related materials. In addition, please note that the possession or use of any hazard group 3 biological agents or the hazard group 2 biological agents *Bordetella pertussis*, *Corynebacterium diphtheriae* and *Neisseria meningitidis* requires written permission from your School Biological Safety Committee and HSE. Please complete this form and register any hazard group 2 and 3 biological agents using <u>Retain</u>. The School Biological Safety Adviser provides advice to Principal Investigators on biological agent risk assessment, HSE notification and licences. You should read the guidance provided on <u>BA risk assessment</u> and <u>biological safety</u> on the Biosafety Unit website. Please complete those boxes that apply to your work.

### **Section 1 Basic Details**

## Section 2 Project

This section should describe the project which should be reasonably detailed but not exhaustive. **2.1: Description of project and activities** 

## **Section 3 Risk Assessment**

This section should describe any potential risks to humans and or the environment. It should include a clear and explicit justification of any statements made about the risks with a logical explanation and any relevant evidence or references. The level of risk is estimated using the matrix given at the end of this form and then stating the risk as either Effectively zero, Low, Low / Medium, Medium or High.

3.1: Biological agents or materials	
Biological agents (Group 1)	
Biological agents (Group 2)	
Biological agents (Group 3)	
Specified animal pathogens (Group 2)	

	gens (Group 3)	
Plant pathogens or pes	its	
Toxins		
Carcinogens		
Allergens		
Human tissues, cells or	r materials	
Human cell cultures		
Animal tissues, cells or	materials	
Animal cell cultures		
Plant tissues, cells or m	naterials	
Plant cell cultures		
Humans		
Animals		
Plants		
Soils		
Environmental samples	s or materials	
Waste		
Other biological materia	als	
3.2: Type of work		
Select all that apply	Laboratory / Fie	dwork / Other
2 2. Human animal a	nlant disaasas	or conditions or environment demage accessized with
	r plant diseases	or conditions or environment damage associated with
3.3: Human, animal or the biological agents	r plant diseases	or conditions or environment damage associated with

3.9: Potential for exposure to biological agents or materials				
Negligible / Low / Medium / High				
t risk				
Research Staff / Other Staff / Students / Visitors / Public / Young people (<18yrs) / New and expectant mothers / Other				
nent of risk to human health (Prior to use of controls)				
Effectively zero / Low / Medium/Low / Medium / High				
nent of risk to environment (Prior to use of controls)				
Effectively zero / Low / Medium/Low / Medium / High				

# Section 4 Control Measures to Eliminate or Reduce Risks of Exposure or Release

This section should des	scribe the types of controls which will be required to carry out the work			
safely. You must follow the hierarchy of risk control by choosing the most effective control				
measures needed to safely carry out your work and not just the easiest controls. Please do not				
include detailed standard operating procedures which should be specified in separate documents.				
4.1: Containment labo	pratories or facilities			
Select all that apply	Laboratory / Animal facility / Plant facility / Other			
4.2: Containment leve				
Select one	Containment level 1 / Containment level 2 / Containment level 3			
4.3: Microbiological sa	afety cabinets (MSC) and isolators			
Select all that apply	Class I / Class II / Class III / Isolator / Other			
4.4: Sharps controls				
4.5: Special controls				
4.6: Personal protection	ve equipment (PPE)			
Select all that apply	Lab coat / Lab gown / Surgical scrubs / Disposable clothing / Apron /			
	Safety spectacles / Goggles / Face shield / Gloves / Headwear / Footwear /			
	Other			
4.7: Respiratory prote	ctive equipment (RPE)			

Created on 23/08/2018

This document is intended for use by the University of Edinburgh staff and students only and supersedes any documents produced prior to the date on this document. The University of Edinburgh is a charitable body, registered in Scotland, with registration number SC005336

	ter mask / Half face respirator / Full face respirator / Powered respirator /
Bro	eathing apparatus / Other
4.8: Storage controls	
4.9: Transport controls	
4.10: Inactivation control	S
Select all that apply Dis	sinfection / Autoclave / Fumigation / Incineration / Other
Disinfection	
	fectant(s), method and validation including concentration of disinfectant ier's instructions or local validation).
	,
Autoclaving	
Please give details of auto	clave method and validation.
All contaminated materials	will be inactivated by autoclaving (100% kill) at 121°C or 134°C prior to
	ng and recycling of reusable laboratory equipment, such as glassware.
	d by annual (at least) thermocouple mapping and each run will be
monitored by continuous c	hart or digital recording of the temperature / time profile.
Or	
	will be inactivated by autoclaving (100% kill) at 121°C or 134°C prior to
	ng and recycling of reusable laboratory equipment, such as glassware.
	d by annual (at least) thermocouple mapping and each run will be indicators (eg Browne TST indicator test strips).
	ndicators (eg browne 101 indicator test strips).
Other	
(Please give details of met	hod and validation).
4.11: Waste disposal rou	tas
4.12: Immunisations (if a	pplicable)
4.13: Instructions, trainin	g and supervision
4.14: HSE notification (if	applicable)
4.15: Specified Animal Pa	athogen Order (SAPO) licence (if applicable)
-	
4.16: Plant Health Order	(PHO) licence (if applicable)

Created on 23/08/2018

#### 4.17: Import, export or other licence (if applicable)

## **Section 5 Emergency Procedures**

This section should describe any emergency procedures used to deal with accidental exposure, release or spillages.

#### **5.1: Emergency procedures**

#### 5.2: Emergency contacts

	gonoy oonaoto		
Name		Position	Telephone
		Principal Investigator	

## **Section 6 Emergency Planning**

This section should describe any emergency plan used to deal with serious accidental release. An emergency plan is only required for high risk work.

6.1: In case of serious accidental release is an emergency plan required to protect humans or environment

#### Yes / No

## Section 7 Approval

This section should be signed and dated by the assessor and principal investigator. It should be signed by the biological safety adviser in addition if the project requires HSE notification or an animal health or plant health licence.

#### 7.1: Assessor

Name	Signature	Date

7.2: Principal investigator					
Name Signature Date					

As the principal investigator for this project you have a legal responsibility to ensure that all those involved or working on the project have an appropriate level of training and expertise to enable safe working. This includes ensuring that workers read and understand this risk assessment and that all the control measures are in strict accordance with those approved for the project. You should also check for compliance with the control measures.

7.3: School Biological Safety Adviser for BSC (Required for notifiable or licenced projects)				
Name	Signature	Date		

Created on 23/08/2018

Section 8 Review					
The risk assessment must be reviewed periodically, at least annually, and immediately if there are any significant changes to the work. 8.1: Assessor					
Name     Signature     Date					
8.2: Principal investigator					
Name     Signature     Date					

Risk Estimation Matrix				
Consequence of	Likelihood of hazard			
hazard	High Medium Low Negligible			
Severe	High	High	Medium	Effectively zero
Modest	High	Medium	Medium / Low	Effectively zero
Minor	Medium / Low	Low	Low	Effectively zero
Negligible	Effectively zero	Effectively zero	Effectively zero	Effectively zero
